

# Math 7 Outline

Math 7 students will be working from the Math Links textbook to receive credit for Math 7. There are **3** tests that cover the disparity between the Math 7 and Math 8 curricula. All Math 7 tests written in Inter-A must be mastered at a 70% minimum.

You have a mandatory math tutorial every week. This tutorial will provide you with some instruction and may include addition worksheets, quizzes, and activities to help you to be successful in your math. This tutorial is worth 10% of your math mark.

## Procedures for completing math sections

- Complete all work for intro package, it may be necessary for you to use additional paper in order for you to **SHOW ALL YOUR WORK!**
- Complete your corrections. **SHOW ALL YOUR WORK!**
- Have your teacher check through work to sign your math tracker.
- On a math test day you can go to the portable and write your math test. A teacher will mark it, and then you return to complete your corrections. If you obtain 70% mastery you then move on to next package.
- If you do not obtain 70% you must still do corrections, then restudy material and re-take the test. When you do master the test, the mastery mark of 70% will be entered into your spreadsheet.

## Mark Breakdown

- Tests 50%
- Tutorial 20%
- Work Habit Marks 5%
- Inter – A Component 25%

## Math 7 Outline:

- Decimals
- Geometry, Triangles and Circles.
- Data Analysis.

As a math 7 student, you are not assigned specific homework on a daily basis. It is your responsibility to complete your homework. You should be completing math **at home three nights a week for approximately ½ hour.**

If you are stuck on a question or a concept please ask the students sitting at your table, your tutor or a teacher right away. Do not feel silly asking for help – our entire math program depends on students asking for help and helping others!

By signing and dating below you are stating you understand how the math program works and will follow the above recommendations.
